**REMARKS** 

The Applicant thanks the Examiner for the thorough consideration given the present

application. Claims 1-4, 7-14, and 17-24 are pending. Claims 5, 6, 15, and 16 were

previously cancelled without prejudice to or disclaimer of the subject matter contained

therein. Claims 1, 2, 11, 12, and 18 are amended, and claims 21-24 are added. Claims 1 and

11 are independent. The Examiner is respectfully requested to reconsider the rejections in

view of the amendments and remarks set forth herein.

**Drawings** 

The Examiner has not indicated whether the drawings are accepted. Clarification in

the next official communication is respectfully requested.

Rejection Under 35 U.S.C. § 103(a)

Claims 1-4, 7-14 and 17-20 stand rejected under 35 U.S.C. §103(a) as being

unpatentable over Mishimagi et al. (U.S. 6,880,960).

This rejection is respectfully traversed.

Amendments to Independent Claims 1 and 11

While not conceding the appropriateness of the Examiner's rejection but merely to

advance the prosecution of the present invention, independent claim 1 has been amended

herein to recite a combination of elements directed to a rear view mirror assembly, including

inter alia

Birch, Stewart, Kolasch & Birch, LLP

Application No. 10/726,194

Amendment dated December 8, 2005

After Final Office Action of August 9, 2005

Docket No.: 0505-1258P

Art Unit 2875

wherein a side of the first lens abuts against a side of the second lens so that a

substantial part of peripheries of the first and second lenses adjoin each other.

In addition, independent claim 11 has been amended herein to recite a combination of

elements directed to a rear view mirror assembly, including inter alia

a base attached to the mirror housing,

wherein the first lens is larger than the second lens, and

wherein a side of the first lens and a side of the second lens fit into a common groove

so that a substantial part of peripheries of the first and the second lenses adjoin each other.

Support for the novel features set forth in claims 1 and 11 can be seen, for example, in

FIG. 4.

According to the present invention, a substantial part of a periphery of the first lens

adjoins (abuts) a substantial part of a periphery of the second lens. Therefore, the mirror

assembly is more compact. Since the first lens borders on the second lens, it is possible for

light emitting from the turn indicator light to pass through the second lens. Accordingly, the

size of the first lens lighting area is not decreased. Thus, the mirror assembly is more

compact while maintaining a large area of light.

Mishimagi et al. merely disclose the first lens and the second lens fitted into the

through separate holes 22d, 22e of the mirror cover body 22, but fails to disclose the features

that the first lens adjoining (abutting) a substantial part of a periphery of the second lens, as

presently claimed. Thus, it is impossible for Mishimagi et al. to make a compact mirror, and

Docket No.: 0505-1258P Art Unit 2875

Page 10 of 11 pages

it is impossible for illumination from the first light to pass through the second lens. Thus,

Mishimagi et al. cannot achieve the effect of the present invention.

The Applicant respectfully submits that the combination of elements as set forth in

each of independent claims 1 and 11, as amended, is not disclosed or made obvious by the

prior art of record, including Mishimagi et al., at least for the reason explained above.

Therefore, independent claims 1 and 11 are in condition for allowance.

The Examiner will note that dependent claims 2, 12, and 18 are amended, and

dependent claims 21-24 are added to set forth additional novel features of the present

invention.

All dependent claims are in condition for allowance due to their dependency from

allowable independent claims, or due to the additional novel features set forth therein.

Accordingly, reconsideration and withdrawal of the rejection under 35 U.S.C. §103(a)

are respectfully requested.

**CONCLUSION** 

Since the remaining patents cited by the Examiner have not been utilized to reject

claims, but merely to show the state of the art, no comment need be made with respect thereto.

All of the stated grounds of rejection have been properly traversed, accommodated, or

rendered moot. It is believed that a full and complete response has been made to the

outstanding Office Action, and that the present application is in condition for allowance.
